

Green Nile Portfolio

GREEN NILE

FROZEN STRAWBERRIES FROM EGYPT

Brief

In Egypt surpassed as number 1 in frozen strawberry exports. The region of Northern Egypt where river Nile enters the Mediterranean Sea is a perfect location for strawberry cultivation. Green Nile has been present in Egypt since 2019 and is probably the only Egyptian company with such a strong knowledge and experience base.

Our message

We have seen the industry developing from scratch and live through painful periods of development. While still evolving, Egypt has taken huge steps in development of cultivation and processing and is now able to supply high-quality berries at very competitive price levels. As always with developing producer countries we advise our customers to rely on Green Nile's enormous experience in the region.

Our goal

Developing our relationships with our partners into strategic ones over time. We advise our partners on quality questions, but in some cases, we will be almost 100% vertically integrated with fields dedicated solely to Green Nile demand.

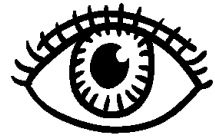

Why Green Nile

Pioneer

Green Nile was one of the first companies to start working with Egyptian farms already in 2013

Full transparency

We work in full transparency with our customers. This is the only way to build a long-term relationship and the only way we operate.

Expertise and experience

We have more than 10 years experience
with Egyptian strawberries

Cultural understanding

Our background and experience have helped us to truly understand our different European clients and all clients around the world.

Available products

Our range of Egyptian strawberries consists of whole strawberries. Whole strawberries are usually supplied uncalibrated, but for some customers, we also do 15-25mm, 25-35mm and 35-45mm calibrators. Different customers need different methods, so we also have the ability to make strawberries as customers' requests.

01

Grade A uncalibrated

02

Grade B uncalibrated

03

Grade A calibrated 25-35 mm

04

Grade A calibrated 15-25 mm

05

Grade A & B uncalibrated

IQF Frozen strawberry Processing

Reception

Fresh strawberries are transported directly to factory for further processing

1

Removing leaves and stems

The leaves and stems of strawberries received are removed by human labor

3

Sorting

The washed and cleaned strawberries are then sorted to remove the bruised ones and other bruised ones and other under standard ones

5

2

Disinfection

The strawberries are disinfected to eliminate bacteria, ensuring the safety of end products

4

Washing and cleaning

The stem removed strawberries are washed and cleaned to remove the dirt

6

Pre-cooling

To save energy as well as ensure quality, the strawberries should be cooled down by cooler and chiller machine

Freezing

The chosen strawberries are frozen, IQF strawberries washing machine can freeze them effectively and efficiently.

Your weighing and packing

Then the frozen strawberries are weighed and packed, we provide multihead weigher and packaging machine, which can weigh and packing the frozen strawberries automatically and precisely

Cooling storage

Finally, the end products are transferred to cool room.
